## Data bases

The Campus Library offers a range of databases where you can find full text versions (e-books, e-journals) and bibliographic references from specialized literature and journals. Due to licensing reasons, some services may only be available for one university and not for the other. Unrestricted access to the entire range of databases is only available at the internet workstations in the reading room.

Feel free to make use of our [courses](#) on data base research and the support offered by the staff at the [Information Desk](#).

### Major data bases

### Single license data bases

installed data bases on the [Single-license-data-bases-PC](#) in the Reading Room
